Trade Licence Business Category & Additional Permission Guide

A guide to identifying when a business may need additional licences or permissions.

Why the business category matters

The trade/profession/calling selected in the CE application determines the nature of the business record and may trigger additional statutory requirements.

Examples

Item	Details
Food/health-related activities	May require applicable food, health or clinical permissions depending on the activity.
Liquor/inflammable goods	May require Excise, Police or other statutory permissions.
Import/export	May require an IEC and other applicable permissions.
Drug/chemist business	May require Drug Control permission.
Regulated financial activity	Money-lending, securities or other regulated activities can require permissions from the relevant regulator.
Travel agency	KMC identifies additional declaration/requirements for this business category.

Important

A CE does not replace other licences. KMC explicitly states that CE issuance/renewal does not absolve the trader from obtaining licences required under other laws.

Important: This is a customer-preparation guide, not an official trade-licence application form. For Kolkata businesses, the Certificate of Enlistment (CE) is administered by the Kolkata Municipal Corporation. Other municipalities/panchayats have their own authorities and requirements.

Prepared for customer guidance by Anjan Digital Services. Trade-licence/Certificate of Enlistment requirements vary by local authority and business activity. Verify the current rules, fees and permissions before submission.
