AIS & Form 26AS Verification Guide

A simple guide to checking tax information before filing an ITR.

Form 26AS

Form 26AS contains tax-related information including TDS/TCS and tax-payment information available through the e-Filing portal.

AIS

AIS can contain TDS/TCS information, SFT information, tax payments, demand/refund information and other reported information.

What to compare

Item	Details
Salary	Compare salary and TDS information with Form 16.
Interest	Compare savings/FD interest with bank records.
TDS	Check that TDS shown in 26AS/AIS agrees with certificates and actual income.
Transactions	Review significant reported transactions and identify any item you do not recognise.
Tax payments	Check advance/self-assessment tax payments, where applicable.

If something looks wrong

Keep supporting evidence. For a reporting mismatch, contact the relevant deductor/reporting entity or use the applicable AIS feedback mechanism rather than simply ignoring the entry.

Important: This is a customer-preparation guide, not tax advice or an official Income Tax Department form. Keep original records and supporting documents safely; do not share e-filing passwords or OTPs with anyone.

Prepared for customer guidance by Anjan Digital Services. Tax treatment and filing requirements depend on the taxpayer's facts and the applicable law for the relevant assessment year. Verify current requirements on the official Income Tax e-Filing portal.
